

Tech Service

From concept to execution , the requirements and drawings undergo an approval process to ensure that costly errors and delays are avoided.

We use Computer Aided Design Systems (AUTOCAD and STAAD) combined with operations experience to give you better engineering services :

- Heavy lift and erection plans using cranes, hydraulic jacks, strand jacks, hydraulic platform trailers & LCT's.
- Supporting stability calculations
- Structural steel, ducting design calculations
- Structural detail engineering
- cutting lists and material estimates
- Piping detail engineering
